10-12. soruları aşağıda verilen metne göre cevaplayınız.

A social network is a website or service where you can talk to or communicate with other people. You can upload your photos and share personal information on your profile page. Social networks connect people with the same interests like music, sports, cinema etc. You can make friends through these sites. Social networks are fun, but they have negative effects, too. First, you can be an addict. Second, some bad people can steal your information. So, you should learn how to use them safely. Finally, online friends can be dangerous, because they are not real friends. Be careful when you choose your online friends and never agree to meet them in person.

10. According to the text, one of the negative effects of social networks is - - - - .

- A) sharing photos
- B) making friends
- C) communication
- D) addiction

11. Which one is false according to text?

- A) You can meet people with the same interests through social networking sites.
- B) People mostly use social networking sites to steal other users' information.
- C) There are both positive and negative sides of social networking sites.
- D) Meeting an online friend in person can be very risky and dangerous.

12. Which can be the best title for the text?

- A) Making Friends Through Social Networks
- B) Learning English Through the Internet
- C) Social Networks and Their Bad Sides
- D) Technology and Communication
